

ADDITIONAL ENGLISH AND MATHEMATICS GROUPS

Additional English and Mathematics Groups

- These are additional timetabled periods of English and Maths delivered by subject specialist staff to target extra support for a range of identified SEN pupils in these core curriculum areas. The programmes of study in both subject areas aim to strengthen the key skills in literacy and numeracy for pupils working significantly below grade C in English and Maths and thus supporting them towards higher levels of examination success in their GCSE English and Maths.
- The schemes of work in both areas are aligned with the core departments' programmes of study and the pupils are provided with additional support with coursework and additional preparations for their GCSE examinations through this timetabled support group.
- All pupils in the Additional English and Mathematics Groups may sit an additional qualification through this support agenda.
